

Brivo Access

Manage facility access, improve security responsiveness and gain actionable insight into your security data.

The proven cloud-based access control solution, Brivo Access delivers a smarter and more powerful way to manage building security.

With robust data analytics, streamlined workflows, identity management integrations, and powerful security features, you can simply protect your people, property and reputation.

FEATURES & BENEFITS

Access Control Visibility

- Gain a complete understanding with the unified view of access events and live video
- Data visualization capability with intuitive user-friendly interface
- Event tracking of door activity and active users with alert settings and reporting features
- Event classification to organize activity by critical action required
- Focus on what matters. Prioritize your alerts by device or door, by user or groups
- Device status read-out in your access control solution
- User and credential management as well as group access permission management
- Lockdown feature to secure the facility in an emergency
- Live and recorded video capture and indexing

Flexibility and Control

- Mobile credentials to modernize your workforce and facility
- Remote and mobile management to control from any device and from anywhere
- Role-based permissions
- Event and user access automation and scheduling
- Automated user access privileges and ability to schedule events
- Identity Access Management to tie user physical security access rights to online access
- Infinite scalability to grow
- Site and door management to set up building access perimeter and interior doors
- Proactively monitor entry points with live video and audio

Data Analytics and Insight

- Data Explorer business intelligence tool built into the platform for advanced analytics
- Global View map-centric multi-site display to zoom into individual facilities to assess usage patterns and risks
- Open platform to tap into hundreds of API integrations to expand connectivity and enhance your ecosystem
- Event trend analysis automatically identifies patterns and anomalies in your access data to surface potential issues and confirm if the event is normal or anomalous

CAPABILITIES
