

The Brivo and eSPACE integrated solution
simplifies access, facility management, and community scheduling.

Manage Security and scheduling challenges for your House of Worship

THE INTEGRATION

- Offers Smartphone access for staff and visitors
- Streamlines Event Management and Registration with Conflict Detection
- Improves Asset Protection and Maintenance Scheduling
- Remotely monitors Building Systems, Lighting and Inventory

The Brivo and eSPACE integration creates efficiency in managing your House of Worship, freeing you to focus on your mission, your community, and most importantly, your ministry.

Improve building security with Brivo Access while creating ease of management. From one platform, manage access controls for front doors, building entry points, and unit doors.

The **Brivo**
and **eSPACE**
integration
synchronizes
building **security**
and **performance**
in one.

HOW IT WORKS

Events scheduled within the eSPACE platform by Smart Church Solutions will replicate in Brivo Access to:

- Manage secure access to meeting rooms and gatherings, remotely, without keys or staff monitoring
- Allow facility managers to manage unit controls such as heating lighting, electronic signage air conditioning
- Save on staff cost, time, and labor in building management
