

Transform Tenant, Visitor, and Guest Experiences Anywhere You Are With the Powerful Combination of Brivo and Swiftlane.

Brivo & Swiftlane revolutionize your building management

Cloud-based Access Control with Facial Recognition and Video Intercom

BENEFITS

- Answer visitor intercom calls remotely and on-the-go
- Provide single or multi-tenant intercom service
- Receive video calls from visitors on mobile, web or tablets
- Improve operational security and productivity
- Employ remote receptionists with no need for a front desk
- Remotely grant temporary access codes to visitors

Elevate your building's security while delivering a superior visitor experience

Take charge of access management like never before and unlock new possibilities in building management efficiency and convenience

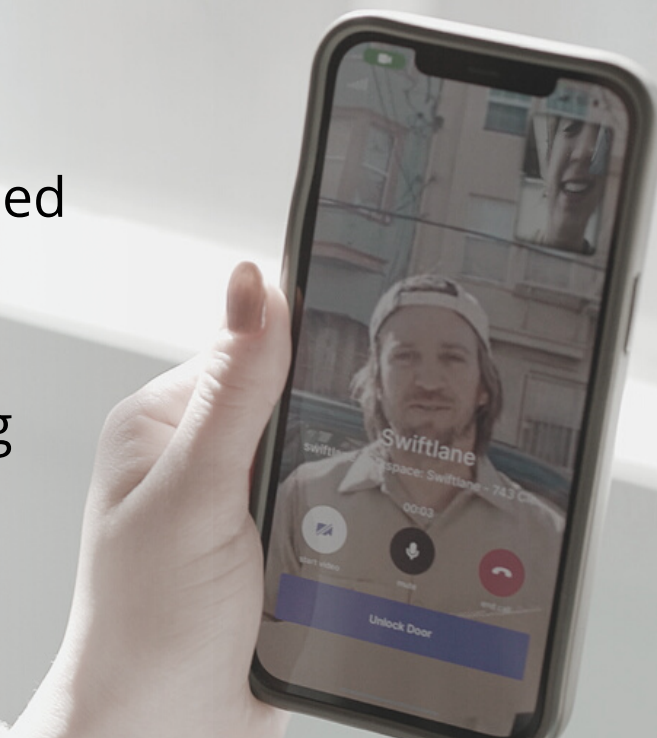

Experience the freedom to manage your building from anywhere with the cloud-based Brivo and Swiftlane integration

THE BRIVO ACCESS AND SWIFTLANE INTEGRATION LETS YOU

- Automatically sync users from the Brivo platform into Swiftlane for face recognition access
- Use the Brivo Access platform to unlock doors from Swiftlane video Intercom calls, reducing hardware and operational costs
- Offer face recognition access alongside key card, fob, or mobile app-based access.
- Reduces operational costs for landlords and management companies
- Monitor user and visitor activity inside the Brivo dashboard

Brivo Access integrated with **Swiftlane** combines cloud-based secure access control with two-way audio and video intercom calling, and unlocking with facial recognition.
