

# Improve Visibility, Drive Action, Enhance Physical Security

with the Brivo &  
Camio integration

## BENEFITS

- **Link entry events with automatic tailgating detection** with an integrated solution that leverages existing cameras with AI capabilities
- **Ensure health-safety as organizations start reopening facilities** through occupancy tracking, exposure attestation and mobile access
- **Empower security managers to take action through real-time alerts** accessible via any browser for immediate unauthorized access intervention
- **Analyze movements without storing any personally identifiable information** while tracking distance between people anonymously on a virtual 3D floor-plane grid

Proactive  
security, not  
passive  
surveillance

## HOW IT WORKS

- Tailgating detection can be added to any camera
- Alerts and dashboards create safer environments
- Detect and deter unauthorized access
- Deploy remotely within minutes
- Easy to use and cost effective
