

Brivo & Immix Integration

Access control made easy with Immix and Brivo's integrated alarm management solution

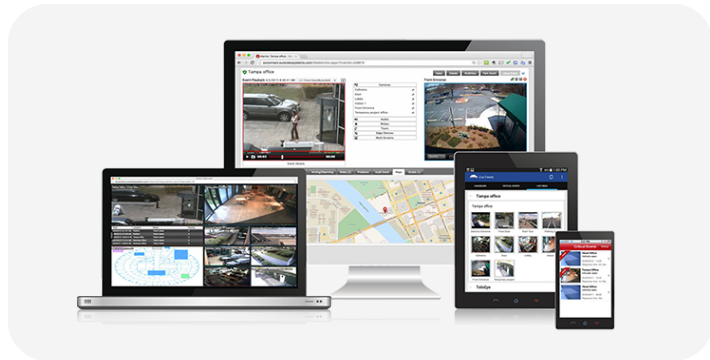

Brivo & Immix allow you to monitor and manage multiple technologies from one single platform

BENEFITS

- Respond to intelligent alarms and incidents easily
- Migrate your Mercury system to the cloud
- Future-Proof your access control
- No need to rip and replace existing hardware
- Simplified control and management of occupant and visitor entry
- Augment security with cloud-based access control integrated with video surveillance

The Brivo Access & Immix Integration Delivers:

- ⊕ A single pane of glass for operators and monitoring centers to manage multiple technologies
- ⊕ Reduced false alarms caused by human error
- ⊕ Easy device onboarding with the click of a mouse

HOW IT WORKS

- 1 View integrated video access events from Brivo Access in the Immix platform
- 2 Manage access control directly within the Immix platform including unlocking doors
- 3 Get video verification of door forced, door held, access denied or other alarm states and respond quickly
