

Solutions for Manufacturers

Improve your operations while protecting your assets and facilities

Insights to Enhance Security, Safety, & Efficiency

PROTECT SITES AND FACILITIES. OPTIMIZE PRODUCTION OPERATIONS

- Identify irregularities and elevate security to protect facilities, sites and areas
- Utilize one central platform to efficiently secure and monitor multiple locations to manage video, access, and credentials
- Grant distinct access for each person entering a gate, building, facility, or any property
- Reduce risk and inefficiency with data to uncover actionable insights into your facilities

Manufacturers face an evolving environment of events - workplace safety incidents, inventory loss, or labor shortages - that impact company operations, supply chain and financing performance. With a robust security system, businesses can protect their property, inventory, and, most importantly, their brand by verifying access and securing every space and entry point to identify safety risks on the floor, warehouse or office area.

Oversee manufacturing operations from one platform to elevate security for every site; every facility, every space that works with any application, any device and any software.

BRIVO SOLUTIONS

For manufacturers, Brivo can identify risks to manufacturing operations, secure facilities, and provide insights to improve performance, safety and decision making.

Centralized Security Platform

Monitor entry points, spaces, buildings, or multiple facilities using one AI-powered platform

Integrated Video

Detect, record and document security events and risks before and as they occur

Granting Access at Scale

Synchronize access controls with your identity systems to manage and track who has access to your facility

Insights and Visibility

Analyze and understand usage patterns, threats and unusual behaviors

Open API Technology

Customize your business operations and management with API integrations tailored to your needs

Modernize Security With Ease

Reduce capital expenses by transitioning existing hardware and systems to the Brivo platform

THE BRIVO ADVANTAGE

Changing the Way People Engage with Spaces
