

Solutions for Multifamily Properties

Create safer and easier-to-manage communities with cloud-first, access control, video surveillance, and smart apartment solutions in one platform.

Insights to optimize operations, resident experience and reduce costs

PROTECT YOUR COMMUNITIES & OPTIMIZE YOUR OPERATIONS

- One centralized platform to manage and monitor access, video, and credentials across your sites
- Reduce risks and operational costs with actionable insights into property performance and usage
- Easily manage access rights for staff, residents, and vendors entering your property
- Automate access provisioning by integrating your property management system with Brivo

Centralize security across all your properties-- from sidewalk to unit with one platform to enhance security for all your sites; and deliver a system and experience that works with any application, any device, and any software.

BRIVO SOLUTIONS FOR MULTIFAMILY PROPERTIES

From one to multi-site property operations, Brivo helps secure and manage your multifamily communities, reduce operator complexity, and elevate residential experiences.

Access Control System

Manage access permissions, monitor entry events, and unlock and lock doors remotely

Video Intercom

Provide a touch screen panel or QR code enabling door access and video intercom calls to reach visitors

Elevator Control

Take control of elevators and give tenants and guests limited access to authorized floors

Wireless Locks

Bring your locks to the cloud and enhance security, manageability, and convenience for staff and residents

Vehicle Access

Deliver a fast, frictionless entry through secure gates by using vehicle's license plate

Video Surveillance

Gain instant, secure access to real-time view of your sites, securely stored in the cloud, and accessible remotely

OPEN API TECHNOLOGY

Customize for your business with API Integrations that drive efficiency and create a better user experience.
