# Brivo and Yardi
Integrated Solution

Simplify access and property management

The Brivo and Yardi integration creates efficiency in property management and eliminates the need for duplicating tenant information across multiple applications when managing resident access.

Improve building security with Brivo Access. From one platform, manage access controls for front doors, building entry points and unit doors.

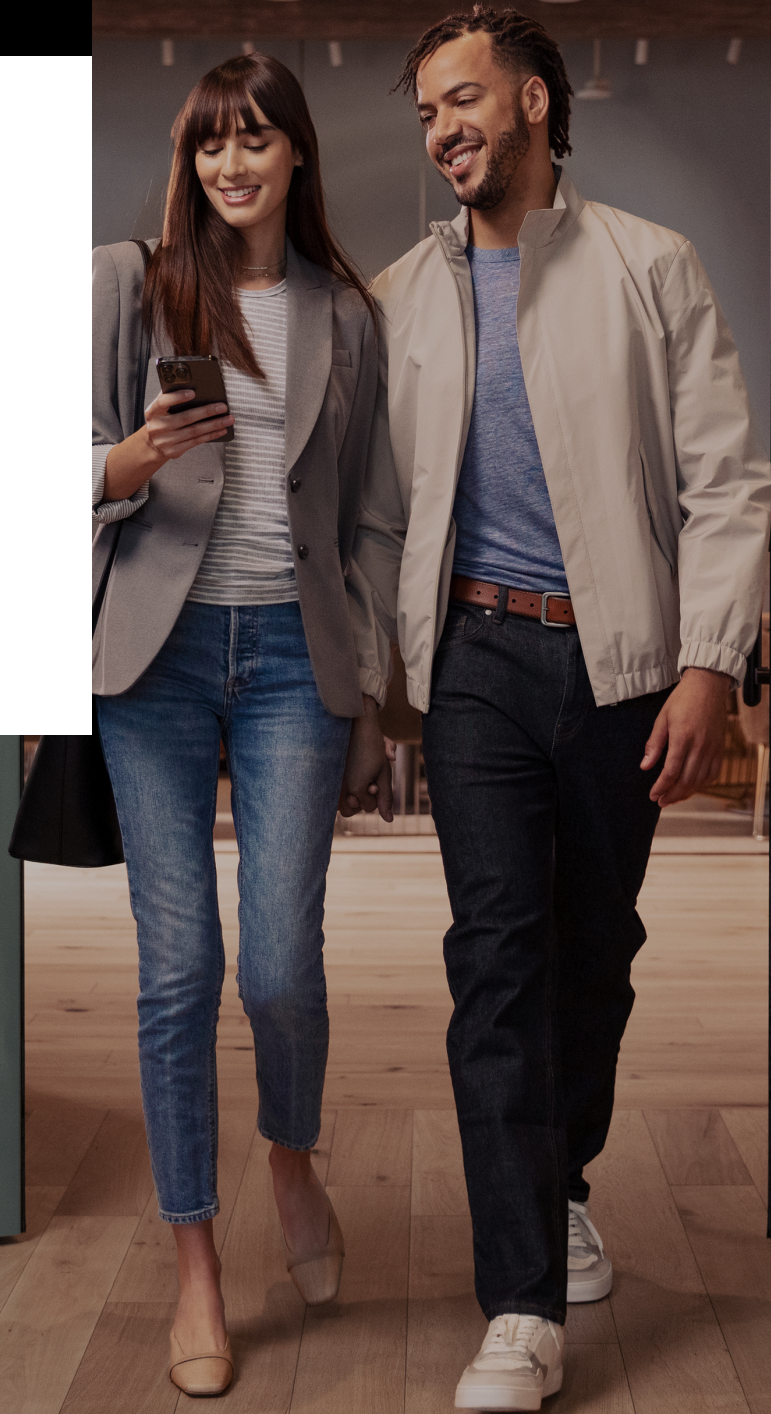

The integration simplifies

Leasing Management
Building Operations
Unit Management
Productivity
Access Control

HOW IT WORKS:

The Brivo and Yardi Voyager integration synchronizes resident data and information across platforms.

Entries made to the Yardi platform will replicate in Brivo Access to help

- Manage moves, vacancies, and unit occupancy remotely, without keys or lock changes

- Simplify and improve the resident access experience

- Save on cost, time and labor in building management
