

Solutions for Retail

Secure and protect your employees,
facilities, and assets

Insights to Reduce Theft and Loss

PROTECT AND OPTIMIZE YOUR RETAIL SPACE AND OPERATIONS

- Secure and monitor multiple locations from one platform to manage video, access, credentials
- Pinpoint irregularities and customize access permission to reduce theft, loss, and shrink.
- Customize credential permissions to secure higher-value assets
- Automate the provisioning of credentials to effectively manage employee turnover and access permissions

Changes in the retail industry are bringing new challenges for retail security. Retail loss and theft is ever evolving, posing a threat to your retail performance as well as individual security. A security system should provide a data view across all of your retail locations allowing you to streamline operations while guarding against theft and loss.

Lead your retail security with one platform to elevate security for every facility, every space; and deliver a system and experience that works with any application, any device and any software.

BRIVO SOLUTIONS FOR RETAIL

For small to large retail operations, Brivo helps to secure your retail properties, create a better experience, and provide insights for better security, performance, and informed decision making.

Centralized Security Platform

Monitor an entry point, a space, an entire building or even several facilities efficiently through one platform powered by AI.

Integrated Video

Detect, record and document security events and risks before and as they occur

Granting Access at Scale

Synchronize access controls with your identity systems to manage and track who has access to your facility

Insights and Visibility

Analyze and understand usage patterns, threats and unusual behaviors

Open API Technology

Customize for your business with API integrations that drive efficiency and create a better user experience

Modernize Security With Ease

Reduce capital expenses by transitioning existing hardware and systems to the Brivo platform
